Career Objective:

Pre-final year Computer Science Engineering student seeking an opportunity to apply basic knowledge in programming and software development, gain hands-on industry experience, and contribute to building reliable and efficient solutions while continuously enhancing technical and professional skills.

Core Competencies:

- **Database management:** SQL
- **Programming languages:** C, Python, Java.
- **Web Development:** HTML, CSS, React
- **Tools & Platforms:** Git, GitHub, VS Code, Xampp

Key Strengths:

- Teamwork
- Time management
- Adaptability
- Responsibility

Areas of Interest:

- Agile Methodology
- Software Engineering
- Machine Learning
- Web Development
- Database Management Systems

Extra-Curricular Activities:

- **Aptithon** -aptitude and problem solving (Apr2025)
- **Appathon** -App development (Apr 2025)
- Completed workshop on python Tkinter conducted by Imagecon
- Completed hands-on workshops on ReactJs Essentials.

Awards and Achievements:

- Received the Academic Excellence Award for outstanding performance in the academic year.
- Second Prize – 200m Race (Inter-college Competition)

Education:

B.E in Computer Science and Engineering (2023-2027)

Sona College of Technology, Salem **CGPA: 9.4**

HSC (2023)

P.V. Matriculation Higher Secondary School, Salem.

Percentage: 97.67%

SSLC (2021)

P.V. Matriculation Higher Secondary School, Salem.

ALL PASS

Projects:

1. Lost & Found System

Tools/Tech: HTML, CSS, PHP, MySQL

Description: Developed a web platform to report and track lost items with an admin dashboard for managing records and updating status.

2. Tourizio – Tourism Website

Tools/Tech: Angular, HTML, CSS, TypeScript

Description: Built a responsive Angular front-end with destination listings and a hotel booking interface.

Internships:

1.AI in Data Analytics Intern – AICTE (Dec 16, 2024)

Tools/Tech: Python, Machine Learning, Data Analytics, CNN

Description: Developed a CNN-based plant disease detection system.

2. App Development Intern – Internshala (Jun 15– Aug 7, 2025)

Tools/Tech: Kotlin, Android Studio, XML

Description: Built a hotel booking interface with room selection features.

3. Angular Intern – Infosys Springboard (Aug 2025 – Oct 2025)

Tools/Tech: Angular, TypeScript, HTML, CSS.

Description: Developed responsive front-end components for a tourism application.

Certifications & Professional Training:

- NPTEL certification in Design Thinking and Primer (**Dec 2023**)
- Infosys Springboard Python Programming (**Sep 2023**)
- Infosys Springboard Angular Full Stack (**June 2023**)
- Internshala Android App Development Certification (**Aug 2025**)
- NPTEL certification Design & Implementation of Human Computer Interface (**Oct 2025- Dec 2025**)
